IMF: Serbia among leaders in growth

The International Monetary Fund (IMF) forecasts that Serbia will be one of the five fastest growing economies in Europe with an average annual growth rate of 3.52% in the period from 2027 to 2031, with the peak of growth around 2030 and 2031. The main drivers of growth will be public investment and the development of the export processing industry, including Chinese investment in mining, especially copper mining.

Stojčić: First Belgrade metro line by 2030

The Belgrade metro, first line of which will connect Železnik and Mirijevo, will be completed by 2030, said the city's chief urban planner Marko Stojčić. Construction will be intensive for the next four years, and overhead structures will be visible from 2028.

President with NALED and Etno-mreža

Serbian President Aleksandar Vučić spoke with representatives of the National Alliance for Local Economic Development (NALED) and the Etno-mreža about improving the efficiency of the state, the quality of services for citizens and the economy, as well as the promotion of national values. The meeting included the topics of cooperation with the government, cities and municipalities in implementing reforms of state systems, regulating property relations, improving the business environment and developing local self-governments. Also discussed were projects in the field of environmental protection, healthcare and food industry, as well as preservation of cultural heritage and traditional crafts.

Fruit production in Serbia

In all likelihood, Serbia will reach a record fruit production of 1.5 million tons by the end of the season, experts estimate. The apricot crop is estimated at 50,000 tons. The harvest is in full swing. Rakija production seems to be the best recipe for making money in the season, when the average purchase price of an apricot is around 35 euro cents.
