Morava Corridor; Transport Connectivity; Digital Technology

A section of the Morava Corridor from Adrani to Preljina opened a month ago, while finishing works are underway on the remaining 12 kilometres. The motorway will connect the Rasina, Moravica and Raška districts, while the branch from the Miloš Veliki motorway toward Požega has made travel toward Zlatibor easier and faster. Comfortable motorway travel is the most important consideration for drivers, and the Morava Corridor is the country's first digital road. This is important for the safety of all road users and the efficiency of public services, while innovative technology enables drivers to receive important real-time information on their in-vehicle displays.

EVERYTHING EU EXPORTERS NEED TO KNOW ABOUT PACKAGING

The Chamber of Commerce and Industry of Serbia has launched a Professional Support Programme for the implementation of the European Union's new Packaging and Packaging Waste Regulation (PPWR), intended for Serbian exporters, particularly small and medium-sized enterprises, to help them prepare their operations in good time for the new requirements taking effect in August 2026. Developed with the support of the Swiss Import Promotion Programme and the Swiss State Secretariat for Economic Affairs, the programme includes expert assistance with assessing packaging compliance, preparing technical documentation and the EU Declaration of Conformity, ensuring packaging traceability, and implementing an extended producer responsibility system.

VOTE OF NO CONFIDENCE IN THE SERBIAN GOVERNMENT WITH SNS SUPPORT

The National Assembly of Serbia is holding an extraordinary session at the request of 109 members of parliament from the Serbian Progressive Party to consider the opposition's motion for a vote of no confidence in Prime Minister Đuro Macut's government. The motion was submitted on February 13 by MPs from several opposition parties, but a debate could not previously be held because the opposition had failed to secure the required 84 signatures.

Outbreak of Sheep and Goat Pox Confirmed in the Raška Area

An outbreak of sheep and goat pox has been confirmed at a farm in the municipality of Raška with 67 sheep and 60 lambs. The veterinary service responded quickly, collected samples and obtained laboratory confirmation within 24 hours, after which all disease-control measures were implemented, including the humane euthanasia of all infected animals and the safe disposal of the carcasses. This is the first outbreak recorded in Serbia this year, while three were registered in the same area last year. Agriculture Minister Dragan Glamočić said the disease was most likely introduced from Albania and North Macedonia and emphasised the state's readiness to respond rapidly.

Sofronijević: Connecting Isolated Parts of the Country Is the Top Priority

Minister of Construction, Transport and Infrastructure Aleksandra Sofronijević said that 115 kilometres of new roads would be opened to traffic in Serbia by the end of the year, connecting transport-isolated parts of the country to the main corridors. Road infrastructure development has contributed to the opening of factories and the strengthening of the economy, making Serbia
