DAILY REPORT ECONOMY REVIEW

Politika

Sustainable Economic Growth Is the Government's Key Argument

In an analysis of Serbia's economic trends, Professor Dragan Đuričin says that progress in macroeconomic stability has been achieved since 2015 and that fiscal consolidation formed the basis of the development cycle. He recalls earlier problems involving deficits, high inflation, unemployment, and illiquidity, as well as the IMF's role in supporting reforms. Sustainable growth is still viewed as an important economic-policy issue, together with the need for structural changes and modernization of the economy.

Politika

New Railway Stop Opened in Novi Sad

A new railway stop has opened in Novi Sad and has begun receiving passengers on the Soko high-speed trains. This expands access to rail transport and gives passengers another point for boarding and disembarking. The opening of the stop is part of efforts to improve railway infrastructure and connect the city to the high-speed rail network.

Politika

Three Types of Regular Electricity Discounts

Citizens have been presented with three types of regular discounts that can reduce their electricity bills. The discounts apply to the calculated value of electricity consumed rather than to every item on the bill, so fees and other charges are not included in the amount subject to the discount. Consumers therefore need to distinguish the price of energy from the total amount shown on the payment slip and check the conditions for qualifying for the benefits.

Politika

Higher Wages Through Increased Productivity

Wage growth is considered in relation to labor productivity, because sustained increases in earnings require the economy to create greater value. The article emphasizes the importance of investment in knowledge, new technologies, and business organization. Without such improvements in efficiency, rising labor costs may place additional pressure on employers and make it more difficult to maintain competitiveness.

Politika

How Many Euros Can Citizens Withdraw from a Bank Per Day?

The article explains the rules and practical limitations that apply when citizens want to withdraw a larger amount of euros in cash from a bank account. Particular attention is given to situations in which the money is needed to purchase real estate or for another major transaction. In addition to the funds available in the account, the payout process may be affected by the bank's cash-management procedures and the need to give advance notice of a large withdrawal.

Politika

IMF Managing Director Georgieva Urges Countries to Reduce Debt

IMF Managing Director Kristalina Georgieva urged countries to reduce public debt more quickly and prepare for risks arising from wars, high interest rates, and the rapid development of artificial intelligence. In a speech in Singapore, she warned that indebtedness limits investment in public needs, particularly in poorer countries. She also pointed to the danger that technological progress
