Air Serbia uplifts over 22.000 passengers within 24 hours.

NEWS FLASH Air Serbia registered its busiest 24 hours on record by handling 22.098 passengers on Monday July 20. It surpasses the previous record set on August 1, 2025 which amounted to 21.600 travellers. The busiest regional routes on Monday were Tivat and Podgorica, while there were most passengers on Zurich and Barcelona flights in Western Europe. Larnaca, Antalya, Athens and Istanbul topped the list of busiest destinations in the Europe Mediterranean area, while New York had the most passengers on long-haul operations. Commenting on the record, Air Serbia's CEO, Jiri Marek, said, "We are currently at the peak of the summer season, with August, which is traditionally the busiest month for air travel, still ahead of us. That is why it is particularly significant that we have already surpassed last year's record in July. This confirms the strong demand for Air Serbia's flights and shows that an increasing number of passengers are choosing our airline to travel to destinations across the region, Europe and beyond".
